

# ONETRAC<sup>TM</sup> LX

Single-Use Cordless Retractor with Integrated **Multi-LED** Light Source

**CORDLESS ILLUMINATION  
WITH INTEGRATED SMOKE  
EVACUATION**

**ONETRAC LX** is a single-use, cordless surgical retractor with integrated multi-LED light source and dual smoke evacuation channels.

This ready-to-use device eliminates the time and expense of reprocessing and reduces the risk of cross-contamination in the surgical setting by making reusable devices and fiber-optic light cables obsolete.

Illumination and smoke evacuation in the depths of a surgical pocket can be met within seconds – no assembly, additional parts/components, or fiber-optic cables required.

### ALSO AVAILABLE

**ONETRAC LX** single-use cordless dual-blade retractor with integrated multi-LED light source and dual smoke evacuation channels

Item # C100270 (LXD)

**ONETRAC LXS** single-use suction device with integrated, cordless radial LED light source

Item # C110200 (Crown Tip)

Item # C110220 (Taper Tip)

Item # C110210 (Metal Tip)

## PRODUCT FEATURES

- Disposable, single-use device reduces risk of cross-contamination
- Integrated cordless LED lights are cooler, providing direct illumination and peak power for over 3 hours of continuous use
- On/off button allows user to cycle through multiple lighting configurations
- Light intensity adjustment dial allows user to set illumination strength at optimal level
- Integrated dual smoke evacuation channels for rapid suction
- Color-coded battery activation tab allows user to easily identify and differentiate blade sizes
- Graded measurement markers on blade to determine depth of surgical pocket
- Newly designed ergonomic handle for improved maneuverability
- Revolutionary reinforced nylon material provides exceptional strength and rigidity
- Atraumatic grip at distal end of blade to maximize tissue adherence
- Patented touch-free battery removal allows for disposal of batteries without battery contact for easy recycling
