

ONETRACTM LX

Single-Use Cordless Retractor with Integrated Multi-LED Light Source

**CORDLESS ILLUMINATION
WITH INTEGRATED SMOKE
EVACUATION**

ONETRAC LX is a single-use, cordless surgical retractor with integrated multi-LED light source and dual smoke evacuation channels.

This ready-to-use device eliminates the time and expense of reprocessing and reduces the risk of cross-contamination in the surgical setting by making reusable, handheld surgical retractors and associated fiber-optic light cables obsolete.

Illumination in the depths of a surgical pocket can be met within seconds – no assembly, additional parts/components, or fiber-optic cables required.

ONETRAC LXD single-use cordless dual-blade retractor with integrated multi-LED light source and dual smoke evacuation channels

Item # C100270 (LXD)

PRODUCT FEATURES

- Disposable, single-use device reduces risk of cross-contamination
- Integrated cordless LED lights provide direct illumination and over 3 hours of continuous use
- On/off button allows user to cycle through multiple lighting configurations and preserve battery life when not in use
- Integrated dual smoke evacuation channels for rapid smoke suction
- Color-coded battery activation tab allows user to easily identify and differentiate blade sizes
- Graded centimeter reference markings along the blade (blade size-specific)
- Newly designed ergonomic handle
- Atraumatic grip at distal end of blade to maximize tissue adherence
- Patented touch-free battery removal allows for disposal of batteries without battery contact for easy recycling
