ONETRAC LXS

Single-Use Suction Device with Integrated Cordless Radial LED Light Source

ONETRAC LXS Yankauer is a single-use suction device with integrated, cordless radial LED light source.

This ready-to-use device eliminates the time and expense of reprocessing and reduces the risk of cross-contamination in the surgical setting by making reusable yankauer devices and associated fiber-optic light cables obsolete.

Illumination in the depths of a surgical pocket can be met within seconds – no assembly, additional parts/components, or fiber-optic cables required.
