

# ONETRAC™

Single-Use Cordless Retractor with Integrated LED Light Source

**ONETRAC is a single-use, cordless surgical retractor with integrated LED light source and smoke evacuation channel.**

This ready-to-use device eliminates the time and expense of reprocessing and reduces the risk of cross-contamination in the surgical setting by making reusable, handheld surgical retractors and associated fiber-optic light cables obsolete.

Illumination in the depths of a surgical pocket can be met within seconds – no assembly, additional parts/components, or fiber-optic cables required.

## PRODUCT FEATURES

- ONETRAC comes ready for use with its own integrated, single-use LED light source and smoke evacuation channel
- On/off switch allows user to preserve battery life when not in use
- No assembly, additional parts/components, or fiber-optic light cables required to achieve illumination
- Lightweight
- Graded centimeter reference markings along the blade (blade size-specific)
- Atraumatic grip at distal end of blade to maximize tissue adherence
- Touch-free battery removal allows for disposal of batteries without battery contact for easy recycling

## TIRED OF EXPENSIVE LIGHTED RETRACTOR SYSTEMS?

Today's lighted retractor systems cost thousands of dollars with hundreds more in recurring disposables and/or reprocessing costs.

Each **ONETRAC** comes ready for use with everything needed to successfully retract soft tissue and illuminate a surgical pocket or cavity, all at a fraction of the cost of other lighted retractor systems. No assembly, additional parts/components, or fiber-optic cables are required.
